Societate prestatoare de servicii energetice agreată ANRE

Oferta noastră:

Servicii de Manager Energetic conf. legii
121/2014

Servicii de consiliere energetică conf. ISO
50001/2011

Recuperatoare/Economizoare de căldură din
gazele de ardere pentru cazane și cuptoare
casnice și industriale

Eficiența Energetică

Pentru a fi eficient trebuie:

Să consumi doar **atât cât este necesar**

Să consumi doar **atunci când este necesar**

Să consumi doar **acolo unde este necesar**

Să consumi doar **așa cum este necesar**

Puteți începe cu adevărat să economisiți energia doar după ce știți cu claritate cum o consumați !

Analiza eficienței energetice

Eficiența energetică (def.) – raportul dintre valoarea rezultatului performant obținut, constând în servicii, bunuri sau energia rezultată și valoarea energiei utilizate în acest scop.

Pentru un consumator final (industrial)

Intensitatea energetică – raportul dintre consumul total de energie (în TEP) și valoarea totală a producției (în Mii lei).

Eficiența energetică – raportul dintre valoarea totală a producției (în Mii lei) și consumul total de energie (în TEP).

Analiza eficienței energetice

Eficiența energetică a utilizării energiei electrice – raportul dintre valoarea totală a producției (în Mii lei) și consumul total de energie electrică (în Mwh).

Eficiența energetică a utilizării gazului natural – raportul dintre valoarea totală a producției (în Mii lei) și consumul total de gaz natural (în Mwh).
